Scope of Works - Proposed Traffic Management

Balmaha is a very popular location for tourist and visitors throughout the year, and already has a double yellow line system running throughout the village.

Therefore, we will minimise the number of individual HGV deliveries during the construction period, with all deliveries planned well in advance of their arrival to site.

We would plan to have the majority of deliveries arriving to site before 10am and none at all after 2pm, although there may have to be exceptions to this that we will communicate to you.

The plan below shows how we propose to accept deliveries to site during the construction works.

- Enter Balmaha Village along B837 passing the Oak Tree Inn on the left, then turning right into the turning/waiting zone.
- Leave turning/waiting area turn left back onto the B837 and then turning right past the Oak Tree Inn and along the access track to the site compound area.
