

**Scottish
Water**

Trusted to serve Scotland

WGMB
JOINT VENTURE

Taking care of your waste water network

Environmental Considerations

- Scottish Water and its delivery partners take environmental responsibilities extremely seriously.
- A suite of ecological surveys have been carried out since 2023, checking for protected species and invasive non-native species.
- We will ensure appropriate mitigations are in place during construction.
- Measures will be in place throughout to help minimise dust levels at the construction site while works are ongoing.
- Our delivery partners WGMB have formalised all environmental protection measures including stringent pollution prevention measures within a Construction Phase Plan (CPP).
